

Connect-Collaborate-Grow

Skill Certification Scheme for Short term Technical Courses

About us:

The shortage of appropriately skilled labour across many industries is emerging as a significant and complex challenge to India's growth and future. According to NASSCOM, each year over 3 million graduates and post-graduates are added to the Indian workforce. However, of these only 25 percent of technical graduates and 10-15 percent of other graduates are considered employable by the rapidly growing IT and ITES segments. Hence, what we have today is a growing skills gap reflecting the slim availability of high-quality college education in India and the galloping pace of the country's service-driven economy, which is growing faster than most countries in the world. As businesses propose to double and treble their workforces and India Inc. strives to maintain its position in the global marketplace, it has become imperative to prepare and plan for a world-class, competent, talented and innovative workforce.

ESDA plays an influential role in creating and sustaining an ecosystem in which skill development and entrepreneurship flourish. ESDA provides the resource, knowledge and supporting platform that is vital for growth in effective employment and entrepreneurship opportunities.

Why Skill Development?

India would need over 500 million skilled people by 2022 across following sectors: Auto and Auto Components, Building and Construction Materials, Building and Construction, Real Estate Services, Electronics and IT Hardware, Education and Skill Development Services, Food Processing, Gems and Jewellery, Healthcare, Textiles, Leather and Leather Goods, Organised Retail, Tourism and Hospitality.. Transportation and Logistics, Media and Entertainment, BFSI, Chemicals and Pharmaceuticals, Furniture and Furnishings, IT and ITES.. While there are millions of jobs opportunities across these sectors; industry continues to struggle for skilled talent. In order to bridge this talent gap, ESDA offers various skill Development programs across the subcontinent.

Need for Certification:

Recognition is very important factor in today's competitive world. Certifications are playing a key role to make positive impact and it helps individual or group to set them in main stream society.
